

The objective of this covenant is to allow homeowners to utilize small satellite dish technology and maintain continuity in the placement of satellite dish equipment so as to minimize the visual impact of this technology on the neighborhood.

**BOARD APPROVED CHANGE TO AVALON HOMEOWNERS ASSOCIATION COVENANTS:**

**'Satellite dishes should be installed to the rear of residence behind any existing fencing. If this is not a viable choice due to problem with azimuth alignment with satellite, placement should be within 15 feet of rear corner on either side of residence affixed to eve of roof or placed on pole not to exceed 4 feet high and not more than 3 feet from residence.**

**Any deviation to Satellite Dish placement must be approved by the Avalon Architectural Review Committee.**

(Approved October 9, 2003)
